

**Press Release – 18-05-2017**

## **ConQuest and Builder's Profile join forces**

**Over 70% of UK building contractors gain instant access to the Builder's Profile open-access Common Database for PQQ and compliance information**

Builder's Profile and ConQuest have announced an industry-changing partnership that makes completed PQQs and compliance information instantly accessible to every estimator, surveyor and buyer using ConQuest. That's 70% of UK main contractors.

The country's leading estimating system can now directly access the Builder's Profile database of completed and up to date PQQ and compliance information. While every subcontractor or supplier now knows a single Builder's Profile PQQ can be seen by every one of the thousands of estimators and buyers who use ConQuest.

Paul Long, Builder's Profile MD says "Today repetitive PQQs have become a thing of the past. Our open-access Common Database provides the technology to share PQQ information with everyone – by joining with ConQuest that vital compliance data is now right in front of the people that matter – the estimators and buyers."

Tony Day, ConQuest CEO, says "This is a real game-changer for the industry. Finally, subcontractors can have a single PQQ which is instantly visible to and discoverable by all ConQuest's estimators, surveyors and buyers."

## **About Builder's Profile**

Builder's Profile is the open-access Common Database service providing compliance and PQQ information to the construction industry. The service allows main contractors, clients and their audit partners to collaborate in collecting, sharing, reviewing and maintaining supply chain and PQQ information. The service reduces information collection time and data duplication and helps in the defence of reputational risk by allowing better compliance management. Additionally, the ease of integration of its common database allows it to effectively complement other information services.

## **About ConQuest**

ConQuest produce the Construction Industry's leading Estimating, Cost Planning and Surveying application. A highly focused industry centric approach has created a platform that accurately meets the needs of construction and is regarded as the industry standard estimating tool for contractors of all sizes. Over thirty years of continual product development ensure ConQuest solutions set the standards for: features, stability, ease of use and flexibility. ConQuest dominates the industry and is in use with: Main Contractors, Specialist Subcontractors, Refurbishment and Fit-Out Contractors throughout the UK and beyond.

## **Builder's Profile Boiler Plate**

- Builder's Profile is a web-based solution that provides an open access database enabling main contractors, subcontractors and suppliers to collate, manage and share supply chain and PQQ information.
- There are no barriers to entry with both Main Contractors and their entire supply chains using the service for free. The scheme is financed through the provision of an optional Premium subscription service to subcontractors providing efficiency gains and financial savings.
- Main contractors may invite their entire supply chain to use Builder's Profile, or easily source new suppliers. A completed Company Profile showcases subcontractors as professionals who are ready to work.
- The scheme is not an accreditation service and doesn't compete with any other such service. It is a refreshingly new, self-financing way of collecting, sharing and maintaining compliance and PQQ information.
- Builder's Profile is the proof that different parts of the construction industry are able to successfully collaborate to save the industry thousands of man-hours and millions of pounds.
- Builder's Profile currently has over 25,000 vendor companies registered and is used by many of the largest industry JV projects (Thames Tideway; HS2) and contractors including Morgan Sindall; Galliford Try; Willmott Dixon; BAM Nuttall; Interserve; Osborne; Jacobs; and now, ConQuest
