Introducing our Latest Features

BIM

For main contractors asking for 'Common Data Environment' information, their supply chain members faced the problem of submitting the Profile with a BIM capability assessment form and it's evidence emailed separately.

With the help of a BIM Working Group of main contractors and their BIM teams, considerable research has been completed. We are pleased to let you know that the BIM capability section is in the final stages of approval and will be scheduled for release soon.

360 KPI

To enhance the existing Project and KPI features, we are soon to be introducing an optional 360 KPI facility; helping main contractors to efficiently monitor and manage their performance.
