

The Bardsley Brand and Relevant Experience

With over 50 years heritage, Bardsley Construction Ltd has built a solid foundation upon which our dynamic, innovative and creative multi-disciplinary business has been built.

The Company has grown to be the byword in delivery and customer satisfaction, with this success being secured through our commitment to Partnership and collaborative working with public and private sector client groups including Local Authorities, Education Bodies, Housing Associations, Private Developers and student accommodation providers. For these organisations we undertake Design and Build and Traditional contracts with considerable Partnering experience in recent years, 65% of our contract workload is secured from repeat clients and have appointments to a number of Partnering Framework Agreements with Housing Association consortia and education providers across the North West and West Yorkshire.

Our diverse workload includes the design and construction of residential properties, facilities for education, health care, leisure, sporting, offices, industrial and retail premises and affordable homes and extra care facilities built for our public and private wider client base. We also have a wealth of experience in refurbishment and conversion projects including work on behalf of Local Authorities to housing stock, schools and other civic and municipal buildings.

We employ a team of directly employed committed and talented people, in addition to our apprentice programme that ensures that we guarantee our future assets. Our ambition is to constantly refine and improve our working practices, adopting a non-adversarial approach to project management and always aim to deliver an excellent product to specification, within budget and on time.

We are committed to environmental protection and sustainability and apply rigorous policies and procedures to ensure we minimise our impact on the globe. We promote re-cycling of materials and seek to minimise both material and energy waste and we operate the most demanding Health and Safety Procedures and expect the same of those working with us resulting in accident and incident rates significantly lower than national trends. We are also fully committed to quality management and have ISO 9001 accreditation along side ISO 14001 environmental accreditation and OHSAS 18001 for our Health & Safety procedures. Not surprisingly, we have received a string of awards and accolades in recognition of our efforts and we strive to become the best building company across the North West and West Yorkshire through the relentless implementation of new techniques, strategies and procedures, and alliances with high quality supply chain partners with equally high aspirations.

Statement of purpose
