

## BUILDER'S PROFILE

June 2018

### **Eight more Main Contractors choose Builder's Profile this month!**

Another eight impressive Main Contractors decide to benefit from the PAS-91 aligned easy-to-use collaboration that the Builder's Profile PQQ & Compliance service delivers. Builder's Profile works with a remarkably fast-developing list of Main Contractors. Many are both Main Contractor and Subcontractor, but all benefit from the ease with which they manage PQQ information, collaborate and simply get on with the job.

#### **New 'Foundation Service' Main Contractors this Month**

This month Builder's Profile welcomes ASG Construction Group, Bardsley Construction and JB Riney who will be emailing their supply chain invites shortly. Subscriber's Premium Profiles are automatically available to these new Main Contractors.

### Builder's Profile – 'Foundation Service'

Builder's Profile Foundation Service is the simple introduction to automated supply chain management and includes all the essentials required for collecting and managing your supply chain compliance information. The service is perfectly suited to companies with a small to medium sized supply chain, looking to move from a manually maintained system. This no-cost and simple-to-use PQQ & Compliance platform provides benefits fast. The service has a standard feature-set and takes only two or three hours to setup.

## Our Main Contractors

### Your Builder's Profile – so much more than a PQQ

We all know how challenging it can be to meet construction legislation requirements. Your Profile is not just a PQQ, but a valued step within Main Contractor Management. Your Profile, a company history of expertise and compliance not only pre-qualifies but integrates with management services across internal systems.

The heart of Builder's Profile service is 'collaboration', to reduce workloads and automate processes while addressing legislation & regulation. Your Profile submission and support of the service, putting it in perspective, is the corner stone of project and site management – populating facilities such as BIM, KPI, estimating and accounting. So, in other words, your Profile supplies the main contractor with what they need to be compliant, accountable and auditable; which is why it is so much more important than just a PQQ.
