

Projects Profile - a simple-to-use, contracts award service that provides construction projects information - supported by industry insight analysis tools - direct to your inbox every week day.

Projects Profile by Builders Profile

Builder's Profile is the open-access
Common Database service providing
PQQ and Compliance information to the
construction industry enabling contractors
& suppliers to easily maintain and share
information. Most Private Sector companies
and all Public Sector concerns require
formal pre-qualification, this has meant
different question-sets for virtually every
contractor. Builder's Profile addresses the
costs, complexities and communication
overheads of multiple PQQs with its simpleto-use PAS-91 aligned service.

For Main Contractors

Builder's Profile provides all the information, documents and tools required to manage a supply chain, no matter how large, small or complex.

For Subcontractors

Builder's Profile is a cost-effective 'complete once, share to many' service that makes PQQ submission simple, and keeping compliance information up-to-date easy.

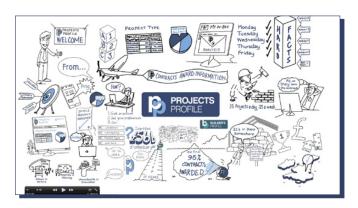

Projects Profile

Projects Profile - from Builder's Profile - a simple-to-use, monthly subscription, contracts award service that provides construction projects information - supported by industry insight analysis tools - direct to your inbox every week day. Projects Profile delivers the accurate awards information you want and helps you generate the industry insight you need. It's construction's hard facts, but without the hard work, or the hard sell.

Why Projects Profile?

Construction is competitive, it's vital to know what clients, contractors and competitors are up to. And one of construction's many challenges is finding accurate, up-to-date contract awards

information. Who's won, or awarded, how much of what and where. Builder's Profile has been delivering PQQ & Compliance services for years, so it's trusted and listens to what industry wants – fast facts, not fiction - which is why Projects Profile was developed.

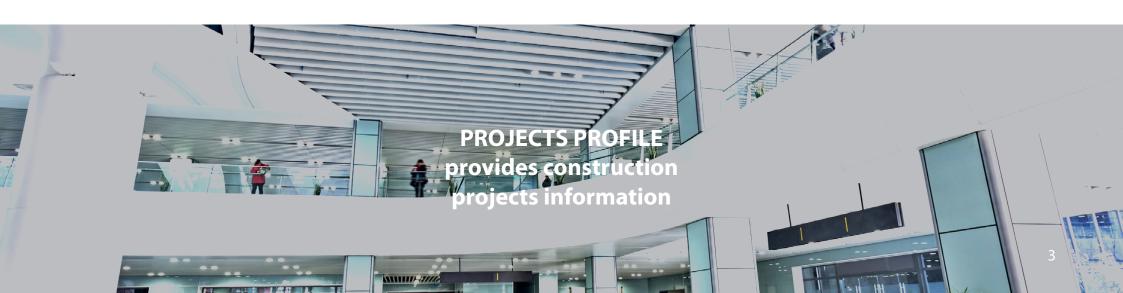

Contract Awards

Building on Builder's Profile's reputation, Projects Profile aims to identify 95% of reported contract awards valued over £50K. There's reporting across UK Private & Public sectors, including frameworks, not limited by value or duration. Small works, such as house extensions, aren't reported.

To receive daily emails of the projects you want, just select your preferences: Location, Category, Project type etc. - and you'll receive matching awards. This is probably the best and fastest-delivered awards information in the country.

Industry Insight Analysis Tools

To get the most value out of the best information, we've created powerful yet simple-to-use industry insight analysis tools. Select a project, contractor or client, and then drill down into the detail. Answer the strategic who, what, where and how much questions that are critical to developing business understanding in an industry sector. Projects Profile delivers the accurate awards information you want and helps you generate the industry insight you need.

Project Analysis Tools

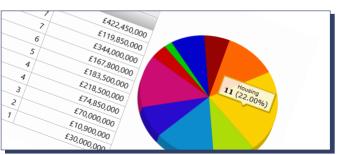

Project Analysis Tools allow you to study the detail of reported contract awarded projects. See who the client and winning contractor are and analyse projects by: description, location, category, type, value and project start date. You can obviously view projects local to you and usefully, those next to your normal areas of activity.

Contractor Analysis Tools

Contractor Analysis Tools allow you to study the activities of contractors. Look at what else they've won, what type and size of projects, which sector they specialise in, and where they're winning work for example. Allowing you to build a broader view of relevant activity to inform decision making.
