BUILDER'S PROFILE

Data Exchange Information

To utilise data efficiencies, we can import and export supply chain data including assessment and approval results across in-house systems. ERP, CRM or SAP system integration is easily accommodated.

You'll be able to work alongside our team of expert developers to explore the specific elements you require. It gives you the opportunity to retain your system identity but enhance it with industry wide recognised quality data.

Data Review Information

The Data Review module acts as a pre-approval check of your supply chain, where we review the contents of every profile making sure it has been completed correctly. Insurances have been validated & accreditations are genuine.

Our Support Team will review every submission, request updates on your behalf where necessary, and rate the data provided based on its quality. They will assign either a Green, Amber or Red rating. Additionally, a supplementary check list can be added on top of our existing requirements. We will review any other areas of importance in your questionnaire in line with your approval processes.

Both the Small and Large reviews provide a comprehensive check of frequently asked questions across Builder's Profile Main Contractors. The large check covers all requirements for medium to large subcontractors / suppliers to satisfy a supply chain approval. Small is aimed at accommodating smaller suppliers / sole traders.
