

Builder's Profile is the open-access Common Database service providing compliance and PQQ information to the construction industry.

What is Builder's Profile?

Builder's Profile is the open-access Common Database service that allows Main Contractors, Subcontractors and Audit partners to share Compliance and PQQ information.

Builder's Profile for **Main Contractors**

Builder's Profile reduces the costs of administering, improving & maintaining supply chain compliance & PQQ information and locating new suppliers.

The Builder's Profile service is the simplest, quickest, lowest-overhead platform for main contractors and subcontractors to publish, share and maintain standards-based compliance & PQQ information. And as Builder's Profile delivers the open-access Common Database platform, it complements and easily integrates with other schemes. The standardised BASE service covers the PAS91 question set plus frequently asked questions – and can be setup and operational within hours at no cost.

Builder's Profile for **Subcontractor & Suppliers**

A user-friendly 'complete once, share to many' service that makes PQQ submission simple, and keeping information up-to-date easy.

A versatile publishing service that benefits subcontractors and suppliers; showcasing them to main contractors as capable professionals that are ready to work. Builder's Profile is the Common Database that construction industry buyers search when looking for supplier information.

For Main Contractors

The Builder's Profile supply chain management service reduces collection costs, data duplication and helps in the defence of reputational risk through improved compliance management. For main contractors and clients joining the open-access Common Database, the comprehensive functionality and flexible configuration provides time saving efficiencies, leaving your management teams to put all the centrally stored supply chain business intelligence to work of you.

Comprehensive Functionality with BASE

BASE is the entry level contractor account, which provides all the essentials tools required for collecting and managing your supply chain compliance information.

This service is perfectly suited to companies with a small to medium sized supply chain, looking to move from a manually maintained system. The management tools and features include:

- Immediate access to Premium Member Profiles
- Fixed Health and Safety & Insurance compliance approvals
- Common Database of over 35,000 subcontractors, suppliers and vendors
- Automatic internal and external notifications
- BASE question set of common frequently asked questions
- Minimum start up requirement

Flexible Configuration with BESPOKE

One of the many advantages of the BESPOKE service is that the additional management features are configurable. Assessment evaluations can be created, automated approval reviews are designed, user permissions allocated – Every aspect of the supply chain process and how best to build Bespoke can be considered. There are also additional modules available to fully configure the processes to suit.

What's Included

The Main Contractor Services team has extensive experience in building bespoke systems, identifying efficiencies and creating solutions. Organisational supply chain management improvements start with the first discussion. The management tools and features include:

- Advanced Searching, Reporting and Analysis
- Customised Scorecards & 360 KPI's
- Project Management
- Bespoke Questions, Emails and Assessments
- Unlimited maintenance and changes to account set up
- Access to additional modules to enhance account

Additional BESPOKE Modules are also available. Please contact Main Contractor Services for more information about service costs and how the system can be set up to meet your requirements.

Subcontractor and Supplier Service

A versatile information service that benefits subcontractors and suppliers by showcasing them to main contractors as capable professionals that are qualified to work. Builder's Profile is the open-access Common Database that construction industry buyers search when looking for suppliers.

Easily solves your PQQ problems

Subcontractors know the time, cost and repetitive pain of completing, maintaining and managing multiple PQQs and compliance information. Builder's Profile solves these problems in a few simple steps.

- Register your company
- Select your clients
- Complete and maintain your Profile

...then share your Builder's Profile with over 70% of UK main contractors to showcase your company as qualified, professional and ready to work. Main contractors actively use Builder's Profile to contact and manage their supply chain.

Your Company Profile may be built over time in manageable stages. If you wish, we'll help you to complete your PQQ information so you can 'go-live' easily and quickly.

Great Value for Money

Premium Membership is available for only **£349 + VAT**. All Premium members can access valuable tools and Profile Reports on the Premium Dashboard.

Effective Profile Distribution with Premium Membership

Premium Members maintain a single Profile available to 70% of UK main contractors and showcases your company as qualified, Professional and ready to work. A premium Profile is effectively distributed to your Clients, making it available for main contractor pre-qualification approval.

Premium members that are Constructionline Gold or Platinum members have the facility to import verified Common Assessment Standard data from their Constructionline account.

Effective Compliance Management

Working with Builder's Profile keeps your data more up to date than ever before, providing your clients with greater confidence in your professional standing. Quoting your BP Membership number in all correspondence, clients can easily find your Profile across these platforms:

- Builder's Profile
- Constructionline
- COINS iPortal
- Access ConQuest Estimating
- The Builders' Conference Serino

Basic Members complete and maintain individual main contractor profiles with the free service. Join the subcontractor database, where construction industry buyers search when looking for suppliers.

Industry Collaborations

Constructionline

In March 2020 Builder's Profile were acquired by Fortius Group and joined Constructionline with Altius VA Limited as part of a group of companies serving the supply chain risk management industry. Builder's Profile continues to operate alongside Constructionline, both offering complimentary supply chain management services to the Buyer community while creating the data exchange efficiencies the construction industry and wider market require.

Common Assessment Standard

The Common Assessment Standard has effectively proven to reduce the Supplier's time spent working through the prequalification process. Importantly, with significant compliance improvements at the center of its design, a Common Assessment Standard provides Clients with the added assurance of 'continuous assessment' – maintaining an approved compliance status more up to date than ever before.

PAS-91

The PAS91 PQQ standard was commissioned by Government and developed by the British Standards Institute (BSI) with the objective of streamlining and lowering the cost of prequalification in construction procurement processes. PAS91 does this by defining a standard construction industry PQQ set. What Builder's Profile service and PAS91 question-set does, is allow contractors and subcontractors to collaborate more effectively by sharing information efficiently. This reduces the need for suppliers to complete multiple PQQs by around 80%.

The logo for PAS91, consisting of a solid blue rounded rectangle with the text "PAS91" in white bold sans-serif font.
